

DINESH SHIVAJI BODHAPALLE

Java Backend Developer

Pune, India | +91 93567 40980 | bodhapalleds2022@gmail.com | [LinkedIn](#) | [GitHub](#) | [LeetCode](#)

PROFESSIONAL SUMMARY

B. Tech Computer Science (AI) student with **8.52 CGPA** and hands-on experience building **Java/Spring Boot backend systems, REST APIs, microservices**, and **Kafka-based event-driven applications**. Proficient in **Core Java, Collections, Multithreading, Java 8+**, and backend development with **Spring Security, JWT, JPA, and SQL**. Built **Pulse-Grid** and **Cart-Forge**, with **250+ LeetCode problems solved**, demonstrating strong foundations in **DSA and software development**.

TECHNICAL SKILLS

Languages: Java, SQL, Python

Core Java: Collections Framework, Multithreading, Java 8+ (Streams, Lambda Expressions), OOP, Exception Handling

Backend & Frameworks: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Spring Cloud, REST APIs, JWT, OAuth2.0

Microservices & Messaging: Microservices Architecture, Apache Kafka, Netflix Eureka, API Gateway, Spring Cloud Config

Frontend : HTML, CSS, JavaScript, React.js

Databases: MySQL, PostgreSQL, MongoDB

Tools : Git, GitHub, Maven, Swagger/Open API, Postman.

DevOps / Cloud : Docker, AWS, Cloud-Fundamentals

PROFESSIONAL EXPERIENCE

Inno AI Labs | AI Backend Intern June 2026 – Present

- Developed **RESTful APIs with Java and Spring Boot**, integrating frontend workflows with backend logic and **ML prediction services**.
- Integrated **multi-model ML inference pipelines** into Spring Boot to generate **cardiovascular risk predictions** from biometric data.
- Implemented **Spring Security, stateless JWT authentication, and RBAC** to secure APIs and protect sensitive application data.
- Implemented **input validation and centralized exception handling**, improving **API reliability and data integrity**.

PROJECTS

Pulse-Grid — AI-Powered Fitness Microservices Platform / *Spring Boot, Spring Cloud, Kafka, Eureka, PostgreSQL, MongoDB, JWT*

- Architected **Pulse-Grid** as a **6-service microservices architecture** (User, Activity, AI, **API Gateway, Config Server, Eureka**) with centralized configuration and dynamic service discovery
- Built an **event-driven pipeline** using **Apache Kafka** to decouple activity logging from AI recommendation generation, enabling asynchronous processing between services
- Integrated **Google Gemini API** via reactive **Web-Client** to generate personalized fitness insights and recommendations from user activity data
- Secured the **API Gateway** with **Spring Security OAuth2** Resource Server, validating **JWTs** for stateless authentication across all downstream services
- Used **PostgreSQL** with **Spring Data JPA** for user management and **MongoDB** for high-throughput activity data storage

Cart-Forge — Smart Product & Order Management API / *Spring Boot, PostgreSQL, Spring Data JPA, REST APIs*

- Built **Cart-Forge**, a **Spring Boot REST API** spanning product and order modules, using **Spring Data JPA** and **PostgreSQL** for data persistence.
- Engineered an order placement workflow with real-time stock validation and **atomic inventory deduction**, generating unique order IDs via **UUID**
- Designed product catalog management with **multipart image upload** and **keyword-based search**
- Designed centralized exception handling using **@RestControllerAdvice**, improving API consistency.
- Added request validation using Bean Validation annotations

EDUCATION

G H Raisoni College of Engineering and Management (GHRCEM) | Pune, India

Expected May 2027

Bachelor's of Technology in Computer Science (Artificial Intelligence) | CGPA: 8.52 / 10.0

LEADERSHIP

- **Technical Co-Lead** — AI Coding Club, GHRCEM Pune: Jun 2025 – Present
Organized and evaluated coding contests and hackathons with participation from **700+** candidates.
Mentored **50+** students in Core Java and Spring Boot development and conducted peer code reviews.
- **Marketing Coordinator** — AI Coding Club, GHRCEM Pune: Jun 2024 – May 2025
Coordinated marketing initiatives, student outreach, and promotion of technical events and workshops.
Developed presentation, communication, and cross-team collaboration skills through event coordination.

CERTIFICATIONS & ACHIEVEMENTS

- Java SE 8 Programmer Certification - Infosys Springboard
- AWS Cloud 101: Foundations of Cloud Computing - Amazon Web Services
- District-Level Athlete in Under-17 Kho-Kho championship
